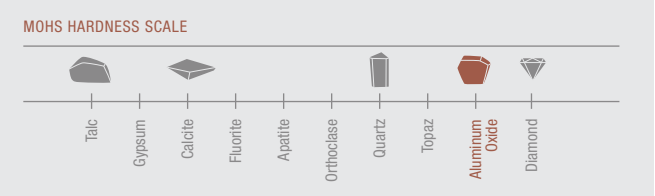
- Hickory and Teak species with traditional to modern colorations

Enhanced Finish
- Enhanced Urethane Finish with Aluminum Oxide
- Protects against normal wear
- Provides durability allowing for ease of maintenance

Engineered for Strength and Stability
- Cross-grain construction provides greater dimensional stability
- 3/8″ thickness provides strength for commercial interiors

Installation Methods
- Tongue and Groove System for a consistent, even and easy installation
- Nail, glue, staple or float
- Approved for all grade levels



Enhanced Urethane Finish with Aluminum Oxide
Aluminum Oxide is the second hardest mineral under diamonds, making it a proven performance solution for protection against foot traffic wear.

Due to the natural characteristics of hardwood, it is recommended to order several samples when making final product selection. Contact your Account Executive for more information.
