Care and Repair Pergo Pro Commercial Laminate

Pergo Pro floors require proper care to keep them looking their best. Follow our easy instructions to maintain the beauty of the installation for the life of the floor.

Regular Maintenance
The surface layer of Pergo Pro flooring is hard and compact, so dirt and dust do not adhere to it easily. The following simple steps are usually all it takes to keep flooring clean.

- For general cleaning, use a dust mop, vacuum with the hard-floor attachment of your vacuum cleaner or wipe occasionally with a damp cotton or cloth mop.
- For heavier cleaning, use Pergo’s Laminate and Hard Surface cleaner or a mixture of household vinegar and water (1-cup vinegar to 1-gallon warm water) or household ammonia and water (1/3 cup ammonia to 1-gallon warm water). Do not use soap or detergent-based cleaners, wax-based products or any type of polish on Pergo Pro floors, as they leave a dull, filmy residue.
- There is never a need to wax or refinish your Pergo Pro floor.

Protect the Floor
While Pergo Pro is remarkably durable, there are a few simple protective measures that are important to protect the floor from scratches and other wear:

- Place walk-off area rugs or mats inside any exterior doorway
- Use felt floor protectors on the legs of desks, chairs, tables and other movable furniture.
- Replace plastic casters on chairs with rubber wheels and lift rather than slide heavy objects across the floor.
- Minor damage to a Pergo Pro plank or tile can be easily repaired with putty or touch up pens
- If the damaged area is larger than 1/4 of an inch, a professional installer can replace an entire plank or tile.

Spot Removal
Staining is unlikely with Pergo Pro due to durable finish coating, but the following techniques can be used for stain and spot removal:

- For chocolate, grease, juice, cordials and wine - use lukewarm water and a non-abrasive cleaner such as ammonia and water or Laminate Flooring Cleaner.
- For tar, markers, crayon, lipstick, oil, shoe polish, ink, nail polish and cigarette burns - use acetone/ nail polish remover or denatured alcohol. Note: Do not use acetone on wallbase or quarter round.
- For candle wax and chewing gum - let harden and scrape carefully with a blunt plastic scraper.
