ActiveSound™
Acoustic Underlay for Floating Clic Resilient Tile*

*Approved for use with Etchworks and Urban Patina

ActiveSound™ underlayment improves comfort by offering excellent acoustics and subfloor correction properties for fast track installations. The foam construction absorbs noise, reduces footfall impact and sound transmission between floors for added comfort, while the patented GripTec® design prevents seam separation under heavy commercial traffic. ActiveSound is a simple, cost-effective solution for commercial floating clic resilient tile applications.

**Protects the Floor**

- Virtually eliminates damage caused by uneven substrates
- Reduces telegraphing of substrate imperfections
- Prevents gapping through GripTec technology

**Improved Comfort**

- Reduces ambient noise in room
- Reduces sound transfer in room below
- Shock-absorbing flooring structure

**Specifications**

- **Style Name**: ActiveSound™
- **Style Number**: VU02
- **Material Thickness**: 1.5mm
- **Dimensions**: 3.85 ft W x 26 ft L
- **Packaging**: 100 sq/ctn
- **Acoustic Testing**:
  - ASTM E492* 72 IIC and 66 STC
  - ASTM E2179 72 IIC and 50 STC
  - ASTM E90 54 IIC and 50 STC
  - ASTM E-2179 ∆26
- **Punctual Conformability PC**: CEN/TS 16354 approx. 1mm = 0.04”
- **Compression Strength**: ASTM D3575 at 0.5mm deflection > 300 kPA/65 psi
- **Dynamic Load**: CEN/TS 16354 > 200,000 cycles
- **Suitable for Caster Chairs**: DIN EN 425 Type W
- **Coefficient of Friction**: > 0.8
- **Reflected Walking Sound Reduction**: ISO 10140 3 dB (A)
- **Water Absorption**: EN 12087 < 1%
- **Thermal Resistance**: DIN 4108 R Value 6.6 per in
- **Heat Resistance**: < 150°F
- **Fire Classification**: EN 14501-1 E

*6” concrete slab with drop ceiling
†6” concrete slab with no drop ceiling
