Mohawk M45

Technical Data Sheet (TDS)
Rubber Cove Base Adhesive

Mohawk M45 is a premium light-colored and solvent-free acrylic adhesive designed for difficult to bond cove base. Using for installing vinyl (PVC), rubber and specialty cove base on clean, dry interior walls. M45 has the high grab and wet strength to keep corners tight and to hold cove base to the wall until it dries. The fast-setting formula provides a durable impact-resistant bond.

BEFORE YOU BEGIN
Follow Mohawk Group instructions regarding trowel size, coverage and application methods.

Make certain the surface is porous by cutting away or perforating non-absorbent wall coverings. Do not apply to vinyl wallpaper. Mohawk cannot be responsible for shrinkage caused by unstable cove base.

INSTALLATION
1. Spread the adhesive using a 1/8” x 1/8” x 1/8” V-Notch trowel, or using a tube applicator tip.
2. The adhesive may be spread on the wall surface or on the back of the wall base.
3. Immediately place the wall base into position while the adhesive is freshly applied.
4. Roll the entire strip of base with a small roller in the direction of the previously placed strip.
5. Wipe smudges and clean spills quickly before the adhesive dries. Use a clean cloth dampened with water.
6. Clean tools with water while the adhesive is still wet.
7. Dried adhesive may require the use of a solvent (odorless mineral spirits.)

USE OVER
- Plaster, brick, wood, concrete, gypsum drywall, plywood.

RECOMMENDED COVERAGE AND TROWEL
- 1/8” x 1/8” x 1/8” V-Notch (150-200 LF/gal)
- 75 - 90LF with Applicator Tip

WORKING TIME
- 20-30 minutes

SHELF LIFE
1 year from manufacturing date in an unopened container.

This product is not photochemically reactive as defined by California Rules 102 and 443. VOC content is below that established by California SCAQMD Rule 1168.
