Durkan is a division of Benefiting Susan G. Komen for the Cure
Nature is such an important element in our lives and I enjoy any opportunity to embrace it and celebrate it in art and design. This collection is accessorized by organics and influenced by an exotic, sensuous style. A very subtle hint of Zen is generated with its quietness in clean lines. These designs are fashionable and vibrant, infused with a modern traditionalism that can be blended into an assortment of styles and venues.
