Journey with me sailing the oceans & visiting exotic islands. While the trade winds breathed into the large sails I was captivated by the many transformations of light & shapes around me. Abstracted interpretations could be seen all around, even the twist in the yachting ropes were highlighted so rhythmically. The natural world with its beautiful creatures of land & sea, when kissed by the light, reflected their amazing textures. The waves shone with translucent motions & the islands were alive with vibrant colors. Each design will bring the illuminated light of day and a glow of harmony to every room.
